PROFESSIONAL SUMMARY

Technical Support Administrator and Network Engineer with extensive experience in ISP infrastructure, NOC operations, and system administration. Proven expertise in managing large-scale networks (Cisco ASR9000), diagnosing complex multi-service issues (IPTV, VoIP, GPON), and achieving high-level KPIs. Skilled in full-stack development, server automation, and infrastructure monitoring. Deeply integrated into the gaming and iGaming sectors, providing technical insights for high-performance, low-latency environments. Currently pursuing a Masters in Network and Computer Technologies while completing CCNA certification.

EXPERIENCE

Orion Telekom

May 2024 – June 2025

Technical Support Administrator

Belgrade, Serbia

- Provided high-level technical support and troubleshooting via phone and ticketing systems (**Kayako**), resolving issues for **ADSL, WiFi, GPON Optics, VoIP, and IPTV** services.
- Monitored real-time infrastructure and base station performance using The DUDE and Winbox, ensuring transport links remained optimized.
- Successfully exceeded department KPIs monthly through efficient resolution of complex routing and network configurations.
- Collaborated with engineering to create and verify network routes and security protocols for residential and business clients.

Orion Telekom

March 2024 – May 2024

NOC L1 & Core Team Intern

Belgrade, Serbia

- Actively monitored core ISP infrastructure, gaining deep exposure to **Cisco ASR9000** core routers and backbone peering.
- Gained hands-on experience with core-level endpoints and peering arrangements in a high-concurrency ISP environment.
- Assisted in identifying and escalating core network anomalies while learning large-scale redundancy and routing protocols.

Eurosoles

July 2021 – March 2024

Electrical Engineer & Network Coordinator

Debeljaa, Serbia

- Architected and maintained the companys internal network, securing cross-departmental connectivity for production and administration.
- Built and maintained semi-automatic polyurethane manufacturing systems, integrating electrical hardware with localized software controllers.
- Optimized hardware procurement and system lifecycle management, **reducing operational downtime by 15%**.

PROJECTS

Orion Project: Data Management System | PHP, MySQL, AWS, Linux, Adobe CC

July 2024 – June 2025

- Engineered an **AI-driven data collection system** leveraging predictive AI software to automate operator metric data streams.
- Designed an intuitive dashboard interface utilizing **Adobe Creative Cloud** for advanced front-end data visualization and real-time filtering.
- Spearheaded responsive **web design and UI/UX layouts**, ensuring optimal rendering performance and streamlined user workflows.
- Deployed and secured the full stack on an **AWS-hosted Linux VPS**, managing server hardening and DNS.

Advanced Home Lab | Raspberry Pi, VMware, Networking

Continuous

- Maintained a private testing environment for **white-hat security testing**, automation scripts, and network monitoring.
- Configured isolated VLANs and VPN nodes to simulate enterprise infrastructure for CCNA preparation.

EDUCATION

ATUSS - ICT Department

Oct. 2025 – Present

Master of Science in Network and Computer Technologies

Belgrade, Serbia

- Advanced focus on applied engineering, high-uptime system administration, and modern network design.

ATUSS - ICT Department

Oct. 2021 – 2025

Bachelor of Science in Communication Technologies

Belgrade, Serbia

- **Core Coursework:** Computer Networks (TCP/IP), Security of Computer Networks & Info Systems, VMware.
- **Software Engineering:** Proficient in Swift, Python, C++, Java, SQL, HTML/CSS, PHP, and Bash.
- **Administration:** Extensive training in Windows and Linux Server Administration and scripting.

SKILLS

Networking : Cisco ASR9000/CLI (CCNA in-progress), GPON, VoIP, IPTV, Winbox, The DUDE, GNS3, Packet Tracer

Systems & AI : Linux/Windows Server Administration, Bash, VMware, AWS, DNS/DHCP, AI Software Integration

Design & UI : Adobe Creative Cloud (Photoshop, Illustrator), UI/UX Layout Design, Responsive Web Design

Programming : Python, Swift, SQL, C/C++, PHP, JavaScript, HTML/CSS, Java, PowerShell

Soft Skills : Critical Thinking, Advanced Problem Solving, KPI Management, Client Training
